

One Piece Shower Module Cast Acrylic

FEATURES

- **A 3636.01F R/L**

The unit is molded with a shampoo/soap shelf along the back wall. All units have an anti-skid floor treatment.

The unit shall be installed in a pit, 7/8" (22) deep so that the finished floor will be level with the top of the threshold.

Units must be set in a mortar base leveled and any clearances between the pit opening and the unit be filled with mortar. Shimming is necessary. It is recommended that a floor drain be located near the entrance to the shower.

The factory supplied components are to include one stainless steel horizontal grab bar, two molded shampoo shelves in corner, a fold-up wheelchair transfer seat with white phenolic bench, and a stainless steel curtain rod.

The unit is thermoformed from a solid color Lucite XL® high gloss acrylic sheet into a one piece, totally seamless unit. This unit is reinforced on the back with a composite matrix which has a backside fire rating of "A" and a flame spread of 25. The shower models are pre-drilled to accept a 2" (51) shower drain (supplied by others).

NOTES

- Anti-skid floor treatment meets performance requirements of ASTM F-462-78.
- Unit conforms to ANSI A-117.1 and ANSI Z-124.2; the shower also complies with the guidelines issued by ADA, US. Architectural and Transportation Barriers Compliance Board (A & T.B.C.B.) and with most city, state, and national standards for barrier free, accessible shower facilities for the handicapped.
- Nominal Dimensions: Inside: 36" x 36" (914 x 914)
Outside: 44" x 39 1/4" (1118 x 997)
Pit Roughing-In: 44 1/2" x 39 1/2" (1130 x 1003)
- Factory installed components are provided with additional back reinforcements to provide code complying structural integrity and are sealed from the backside.
