

**General:**

Precast terrazzo one piece products are made of black and white marble chips cast in grey portland cement to produce a compressive strength of not less than 3000 P.S.I., seven days after casting. The terrazzo surface is ground and polished with all air holes and/or pits grouted and the excess removed. Mop service basins are available in custom sizes.

TTB series is 10" (254) high. Shoulders shall not be less than 8" (203) high inside and 10" (254) high outside. Shoulder width shall be 1¼" (32) on all sides with ½" (13) pitch toward the inside. The TTB series available with plain curbs only.

The drain body in mop basins are made of stainless steel cast integrally and provide for a caulked lead connection not less than 1" (25) deep to a 3" (76) pipe.

**Installation:**

Establish ¼" (6) clearance between mop service basin and building wall. It is required that the entire area between the mop service basin and the building floor has a ½" (13) layer of mortar in order that the mop service basin is level.

Optional stainless steel tiling flanges available.
